

The Ultimate is Mountain Pleat.

More than 10% extra:

- Filtration Surface Area
- Longer service intervals

H 34 1780/14 KIT

MANN+HUMMEL Newest Innovation Gives You More

More filtration surface area, pleated in a **NEW** mountain-like orientation

MANN+HUMMEL has optimized the pleating in our newest EDM filter, making this our ultimate EDM filter in the category.

Benefits:

- Extended service life
- Highly optimized fluid flow across varying pleat heights
- Exceptional contaminant holding ability
- Maximum filtration capabilities due to precision pleat-to-pleat distance
- Ultra-low turbidity in extreme testing environments
- Stable and predictable performance across testing environments
- Leak-proof and optimized adapter connection

Features:

- Incredible 16.6m² filtration surface area
- Pleating at various heights to better hold contaminants and allow fluid flow
- Robust metal housing that is highly corrosion resistant
- Glue beads between pleats form a stable framework for the bellow
- Improved handle design
- Available with center tube (H 34 1780/15)

Ready to give your machine the ultimate?

Call your local distributor today and ask for the **NEW Ultimate Mountain Pleat Filter**: H 34 1780/14 KIT or H 34 1780/15.
